

Proposed Solutions:

Module	Type	Description
Super Admin(Infinity Jewellers).	Web Application.	Manages shops, users, schemes, transactions, ads, roles, notifications, and system settings with dashboard and reports.
Shop Admin.	Mobile App.	Register customers, manage customers, create schemes, track payments, send notifications, and handle reports.
Customers	Mobile App.	Log in, enroll in schemes, make payments, track progress, and receive updates and notifications.

1. Shop page

FR#	Requirement Description	Remarks
FR1	The system must provide a Shops page displaying a list of all registered shops.	
FR2	The system must display the shop name and location in the shop list.	
FR3	The system must provide a “Create Shop” button on the Shops page.	

1.1 Create shop(popup)

FR#	Requirement Description	Remarks
FR1	The system must open a Create Shop popup when the “Create Shop” button is clicked.	
FR2	The system must allow entering the shop name and logo.	
FR3	The system must allow entering the shop contact number and email address.	
FR4	The system must allow entering the shop address/location details.	
FR5	The system must allow entering the shop admin name and email address.	
FR6	The system must allow entering the shop admin contact number.	
FR7	The system must allow entering a password for the shop admin account.	
FR8	The system must provide a Save option to register the shop.	

1.2. Shop (On Click list of Shops)

FR#	Requirement Description	Remarks
FR1	The system must open the selected shop module when a shop is clicked from the shop list.	
FR2	The system must provide a Details,Overview Dashboard, View Schemes, Transactions, Ads and Setting tab for the selected shop.	

1.2.1. Details tab

FR#	Requirement Description	Remarks
FR1	The system must provide a Details tab for the selected shop.	
FR2	The system must display the shop name, logo, admin name, mobile number, email address, location details,PAN, Aadhaar details and Nominee name.	
FR3	The system must display the shop registration date.	
FR4	The system must display the shop status as Active or Inactive.	

1.2.2 Dashboard

FR#	Requirement Description	Remarks
FR1	The system must provide an Overview Dashboard tab for the selected shop.	
FR2	The system must display the total number of registered users.	
FR3	The system must display the total number of users registered in the current month.	
FR4	The system must display the total number of customers.	
FR5	The system must display the total number of customers added in the current month.	
FR6	The system must display the number of customers due for renewal in the current month.	
FR7	The system must display today's total collection amount.	
FR8	The system must display the current month total collection amount.	
FR9	The system must refresh dashboard values based on latest transactions and registrations.	

1.2.3. Schemes

FR#	Requirement Description	Remarks
FR1	The system must provide a View Schemes tab for the selected shop.	
FR2	The system must display a list of all schemes created for the selected shop.	
FR3	The system must display the scheme ID, name and type.	
FR4	The system must display the scheme description and duration.	
FR5	The system must display the scheme image, if available.	Optional
FR6	The system must allow viewing complete scheme details.	

1.2.4. Transactions

FR#	Requirement Description	Remarks
FR1	The system must provide a Transactions tab for the selected shop.	
FR2	The system must display today's transaction summary.	
FR3	The system must display the current month transaction summary.	
FR4	The system must display pending payment count or amount.	
FR5	The system must display a failed payment count or amount.	
FR6	The system must provide a "Record Payment" option to capture customer payments.	
FR7	The system must display transactions separately for each scheme.	
FR8	The system must display a list of all transactions and transaction date.	
FR1o	The system must display the customer name,scheme name,payment mode and paid amount	
FR10	The system must allow viewing transaction details.	

1.2.5. Ads

FR#	Requirement Description	Remarks
FR1	The system must provide an Ads tab for the selected shop.	
FR2	The system must display a list of all advertisements created for the selected shop.	

FR3	The system must provide a “Create Ad” button to add new advertisements.	
FR4	The system must allow entering the advertisement title and description or offer details.	
FR5	The system must allow uploading advertisement images/banners.	
FR6	The system must allow selecting advertisement start date and end date.	
FR7	The system must provide a Save option to create the advertisement.	
FR8	The system must allow editing existing advertisements.	
FR9	The system must allow deleting advertisements.	Optional

1.2.6. Settings

FR#	Requirement Description	Remarks
FR1	The system must provide a Settings tab for the selected shop.	
FR2	The system must allow updating shop branding details.	
FR3	The system must allow changing the shop name.	
FR4	The system must allow uploading or changing the shop logo.	
FR5	The system must allow changing the shop admin password.	
FR6	The system must allow configuring EMI due date settings.	
FR7	The system must allow configuring payment reminder notifications.	
FR8	The system must allow enabling or disabling promotional notifications.	
FR9	The system must allow enabling or disabling gold rate update notifications.	
FR10	The system must allow saving updated settings.	
FR12	The system must display current saved settings values.	

2. Customers page

FR#	Requirement Description	Remarks
FR1	The system must provide a Customer page for the selected shop.	
FR2	The system must display a list of all customers.	
FR3	The system must provide an “Add Customer” button.	

FR4	The system must provide an “Edit” option for each customer.	
FR5	The system must provide filter functionality for customers.	
FR6	The system must provide search functionality for customers.	
FR7	The system must display customer records in structured list format.	

2.1. Add customer(pop-up)

FR#	Requirement Description	Remarks
FR1	The system must provide an “Add Customer” button on the Customer page.	
FR2	The system must open an “Add Customer” popup form when the button is clicked.	
FR3	The system must allow entering the customer name and mobile number.	
FR4	The system must automatically generate a unique customer ID.	Auto-generated
FR5	The system must allow entering the customer Aadhaar number and email address.	
FR6	The system must allow entering the customer address details.	
FR7	The system must provide a “Save” button to create the customer record.	

2.2. Edit

2.2.1 User details(Edit)

FR#	Requirement Description	Remarks
FR1	The system must provide a “User Details Edit” button inside the Edit Customer section.	
FR2	The system must allow opening editable customer personal details form.	
FR3	The system must allow updating customer name, mobile number, email, and address.	
FR4	The system must restrict editing of Customer ID.	Auto-generated
FR5	The system must validate updated mobile numbers and Aadhaar format.	
FR6	The system must allow saving updated user details.	
FR7	The system must display a success message after updating user details.	

2.2.2 Schemes(Edit)

FR#	Requirement Description	Remarks
FR1	The system must provide a “Scheme Edit” button inside Edit Customer.	
FR2	The system must display all schemes linked to the selected customer.	
FR3	The system must allow viewing scheme details.	
FR4	The system must allow updating scheme status (Active, Completed, Paused).	
FR5	The system must allow updating scheme information if required.	Optional
FR6	The system must save updated scheme details.	
FR7	The system must show confirmation after update.	

2.3. Filters

FR#	Requirement Description	Remarks
FR1	The system must provide a filter option in the Customer page.	
FR2	The system must allow filtering customers by name,ID,email,mobile number,status(active/inactive).	
FR3	The system must display filtered results instantly.	
FR4	The system must allow clearing all applied filters.	
FR5	The system must reset the customer list after clearing filters.	

2.4. Search

FR#	Requirement Description	Remarks
FR1	The system must provide a search option in the Customer page.	
FR2	The system must allow searching customers by name and mobile number	
FR3	The system must display matching results dynamically.	
FR4	The system must show a “no results found” message if no match exists.	
FR5	The system must allow clearing the search input to reset the list.	

2.5 Customers list (on click customer name)

FR#	Requirement Description	Remarks
FR1	The system must open a Customer Detail View when a customer name is selected from the list.	
FR2	The system must provide a tab-based layout for the Customer Detail View.	
FR3	The system must include a Customer Details,Schemes and Statements tabs.	
FR4	The system must provide an “Add Scheme” button at the top of the page.	
FR5	The system must allow enrolling the customer into a new scheme using the “Add Scheme” button.	

2.5.1. Add Schemes (popup)

FR#	Requirement Description	Remarks
FR1	The system must open an “Add Scheme” popup when the Add Scheme button is clicked.	
FR2	The system must provide a dropdown to select Scheme Name and Scheme ID.	
FR3	The system must allow selecting a scheme for enrollment.	
FR4	The system must display Customer Name, ID, Mobile Number ,Address and Email in the popup.	Auto-filled
FR5	The system must allow entering a Nominee Name.	
FR6	The system must allow entering a Nominee Contact Number.	
FR7	The system must allow entering Scheme Duration.	
FR8	The system must allow entering an Aadhaar Number.	Optional validation
FR9	The system must allow entering PAN Number.	Optional
FR10	The system must validate required fields before saving.	
FR11	The system must provide a “Save” button at the bottom of the popup.	
FR12	The system must enroll the customer into the selected scheme after saving.	
FR13	The system must display a success message after successful enrollment.	
FR14	The system must close the popup after successful save.	

2.5.2. Customer details tab

FR#	Requirement Description	Remarks
FR1	The system must provide a “Customer Details” tab in the Customer Detail View.	
FR2	The system must display the Customer Name, ID and Mobile Number.	
FR3	The system must display the Join Date of the customer.	
FR4	The system must display the Address / Location details.	
FR5	The system must display the Email Address of the customer.	
FR6	The system must display the Nominee details of the customer.	

2.5.3. Schemes tab

FR#	Requirement Description	Remarks
FR1	The system must provide a “Schemes” tab in the Customer Detail View.	
FR2	The system must display all schemes enrolled by the customer in a table format.	
FR3	The system must display Scheme ID in the table.	
FR4	The system must display Scheme Name.	
FR5	The system must display Scheme Type (Money Saving / Gold Accumulation).	
FR6	The system must display Scheme Start Date. and End Date	
FR7	The system must display EMI or installment amount.	
FR8	The system must display the total Paid amount.	
FR9	The system must display the Pending amount.	
FR10	The system must display Scheme Status (Active/Completed/Closed).	
FR11	The system must provide an “Action” column for each scheme.	
FR12	The system must allow capturing transactions from the Action option.	
FR13	The system must provide a “View” option under Action for each scheme.	
FR14	The system must open a detailed scheme view when “View” is clicked.	

2.5.3.1. Scheme detailed view(on view click)

FR#	Requirement Description	Remarks
FR1	The system must display the monthly paid amount in the scheme detail view.	
FR2	The system must display the due amount for each month.	
FR3	The system must display gold accumulation details (for gold schemes).	
FR4	The system must display the total amount saved by the customer.	
FR5	The system must display transaction date and time for each payment.	
FR6	The system must display nominee details linked to the scheme/customer.	
FR7	The system must organize all details in a structured view for easy tracking.	
FR8	The system must provide option for capturing payment.	

2.5.4. Statement tab

FR#	Requirement Description	Remarks
FR1	The system must provide a “Statements” tab in the Customer Detail View.	
FR2	The system must provide a filter option at the top of the Statements tab.	
FR3	The system must allow filtering statements by Scheme Name and Scheme ID using a dropdown.	
FR4	The system must display all transaction statements when no filter is applied.	
FR5	The system must provide a button for capturing payment.	
FR6	The system must display only filtered statements when a scheme is selected.	
FR7	The system must display Transaction ID for each record.	
FR8	The system must display Customer Name and Payment Date and Time.	
FR9	The system must display Scheme ID and Scheme Name.	
FR10	The system must display Installment Month.	
FR11	The system must display Paid Amount.	
FR12	The system must display Gold Quantity (if applicable).	
FR13	The system must display Payment Mode.	
FR14	The system must provide a Receipt view/download option.	

FR15	The system must display Collected By information for each payment.	
FR16	The system must dynamically update results based on filter selection.	

Capture Payment

FR#	Requirement Description	Remarks
FR1	The system must open a “Capture Payment” popup when the Capture Payment button is clicked.	
FR2	The system must display the shop name,logo,address and Mobile number.	
FR3	The system must display Customer Name.	Auto-filled
FR4	The system must display Customer ID.	Auto-filled
FR5	The system must display Scheme Name.	Auto-filled
FR6	The system must display Scheme ID.	Auto-filled
FR7	The system must display Installment Month / Due Month.	Auto-filled / Selectable
FR	The system must allow entering Paid Amount.	
FR9	The system must display Gold Quantity based on payment (for gold schemes).	Auto-calculated
FR10	The system must allow selecting Payment Mode (Cash / UPI / Card / Bank Transfer).	
FR11	The system must allow entering Transaction Reference Number.	Optional
FR12	The system must display Payment Date and Time.	Auto-generated / Editable if needed
FR13	The system must display Collected By user name.	Auto-filled
FR15	The system must provide a “Save / Submit Payment” button.	
FR16	The system must generate receipts after successful payment.	
FR17	The system must update statement and scheme progress after saving payment.
